TAD 1630 GE Genset Engine – Gen Pac

n. $AA = 1764/69.4$	ł
A = 1665/65.6	BB = 1089/42.9
B = 1089/42.9	CC = 2292/90.2

Gen Pac – Genset engine mounted on an expandable base frame. Complete unit with engine, radiator, radiator core guard, fan, fan and belt guard providing reduced delivery time and installation cost and simplified transportation.

- 1. Tropical radiator
- 2. Intercooler
- 3. Gear driven coolant pump
- 4. Air restriciton indicator
- 5. Coolant filter
- 6. Turbocharger
- 7. Air cooled exhaust manifold
- 8. Lift eyelet
- 9. Alternator
- 10. Coolant pipe, inlet
- 11. By-pass oil filter of spin-on type
- 12. Oil cooler
- 13. Full-flow oil filters of spin-on type
- 14. Crankcase ventilation
- 15. Flywheel housing SAE 1
- 16. Relay for inlet manifold heater
- 17. Air filter
- 18. Cable iron
- 19. Inlet manifold heater
- 20. Twin fuel filters of throw-away type
- 21. Coolant pipe, outlet
- 22. Fan guard
- 23. Radiator guard *)
- 24. Starter motor
- 25. Electric speed govenor
- 26. Fuel pipes for tank connection
- 27. Injection pump
- 28. Oil filler
- 29. Belt guard *)
- 30. Automatic belt tensioner
- 31. Expandable base frame

*) Optional

Technical data TAD 1630 GE

Volvo Penta reserves the right to make changes at any time, without notice, as to technical data, prices, materials, standard Equipment, specifications and models, and to discontinue models.

General

In line four stroke diesel engine with dire	ect injection
Turbocharged and air to air intercooled	
Number of cylinders	6
Displacement, total	16.12 litres / 984 in ³
Firing order	1-5-3-6-2-4
Rotation direction, anti-clockwise viewe	d towards flywheel

Bore		144.00 mm	/ 5.67 in			
Stroke		165 mm / 6.50 in				
Compression ratio		15.0:1				
Dry weight, kg/lb	Gen Pac	1795/3954	Engine only	1538/3388*		
Wet weight, kg/lb	Gen Pac	1912/4212	Engine only	1650/3635*		
*) Including radiator and intercooler

Power Standards The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data ap-Piles to an engine without cooling fan and operating on a fund bit 6271. The technical data applies to an engine without cooling fan and operating on a fund bit 6271. The Vig (18360 BTU/b) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/lmp gal), also where this involves a deviation from the standards. Power output guaranteed within 0 to +2 % at rated ambient conditions at delivery. Ratings are based on ISO 8528. Engine speed governing in accordance with ISO 3046/IV, class A1 and ISO 8528--5 G2 (G3 with electronic speed governor).

Exhaust emissions

The engine exhaust emissions complies wih EPA, CARB and TA --luft regulations.

Rating Guidelines

PRIME POWER rating corresponds to ISO Standard Power for continuous operation. It is applicable for supplying electrical power at variable load for an unlimited number of hours instead of com-mercially purchased power. A10 % overload capability is available for this rating. CONTINUOUS STANDBY POWER rating corresponds to ISO Power. It is applicable for supplying standby electrical power at variable load for an unlimited number of hours in the event of normal util-

ity power failure. A 10 % overload capability is available for this rating. MAXIMUM STANDBY POWER rating corresponds to ISO Standard Fuel Stop Power. It is applica-

ble for supplying standby electrical power at variable load in areas with well established electrical networks in the event of normal utility power failure. No overload capability is available for this rating.
